EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the specification, page 1, line 3, after "filed on November 20, 2001, entitled "Magnetic Head Having

Raised Element and Magnetic Head Apparatus Using the Same'", the phrase --, now U.S. Pat. No. 6,639,756-- has been inserted.

In claim 11, line 2, "surface having the recording medium" has been changed to -- surface [having] facing the recording medium --.

2. The above amendment to claim 11 is made for consistency with claim 1, lines 5-6, "a surface of the slider facing a recording medium".

3. The following is an examiner's statement of reasons for allowance: The prior art of record neither shows nor suggests a step face between a leading edge of a trailing ABS face and a surface facing a recording medium, said step face lower than a plurality of ABS faces at the same level, in combination with a surface having a magnetic element further rising toward the recording medium, and further in combination with said ABS faces being formed on the surface of the slider facing the recording medium. Although Berg (US Pat. No. 6483667 B1) shows ABS surfaces 150 rising from a surface facing a recording medium, and a stepped trailing edge surface including surface 162 having a magnetic element, "Bearing surface 162 is coplanar with bearing

Art Unit: 2652

surfaces 150" (see col. 6, lines 7-8). The reference is silent regarding a surface having an element rising toward a recording medium further than an ABS height.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
